Overview

A+ SSDTOOL is an application which provides user to monitor and manage ADATA Industrial SSD/NVMe.

A+ SSDTOOL enables user to obtain ADATA Industrial SSD/NVMe health & status. User can check storage usage and the life of ADATA Industrial SSD/NVMe.

A+ SSDTOOL provides the security erase feature for ADATA Industrial SATA SSD to do full erase.

A+ SSDTOOL provides **Overview, Device Information, S.M.A.R.T. Attribute, Utilities, Alert, and System Information.**

System Requirement

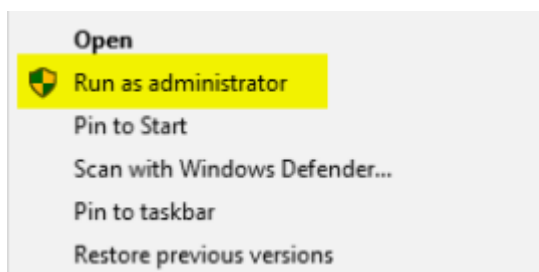

| Item | Minimum Requirement |
|--------------------|---|
| Processor | Intel Core 2 Duo series or same level CPU |
| Memory | 4 GB RAM |
| Free Disk Space | 20 MB available hard disk space |
| Operational System | Windows 10 or above |

Installation & Running

Double click on A+ SSDTOOL_v2.1.0.0_R_XXXX.msi file then follow the instruction on screen to complete the installation.

 A+SSDTOOL_v2.0.0.0_R_211201

After completed installation, use can see there is an A+ SSDTOOL logo on Windows desktop. Right click A+ SSDTOOL on Windows Desktop and click Run as administrator.

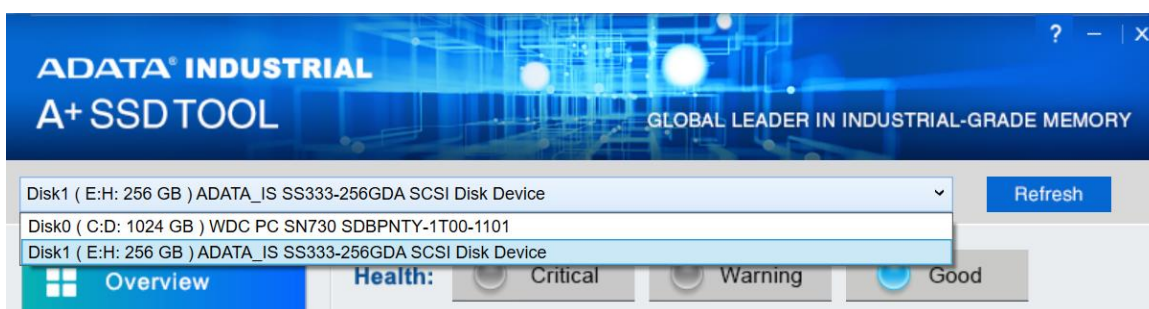

Overview

When you run ADATA A+ SSDTOOL, the main screen displays Overview.

There are 4 sections in Overview.

Device dropdown menu:

User can select the disk which has been connected to system. All disks will be displayed including non ADATA device.

If user installed an external device, please click **Refresh** to update list disk.

NOTE: ADATA A+ SSDTOOL only support ADATA Industrial SSD product, other brand may get incorrect information.

Health:

Drive Health shows the current status of the selected SSD which was from S.A.M.R.T attributes.

Good: All attributes are above threshold level

Warning: Some attributes are beyond threshold level

Critical: Important attributes are beyond threshold level, please backup this SSD ASAP.

1. Temperature:

The temperature value is based on the SMART attribute

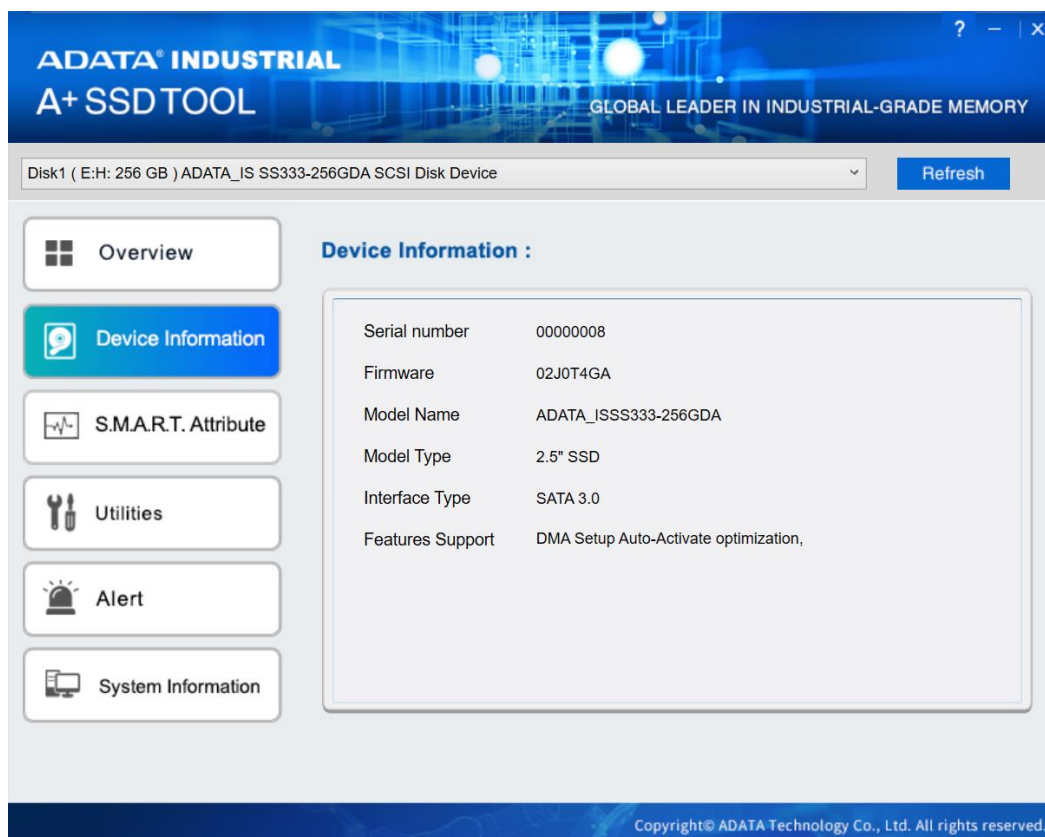

2. Capacity:

Capacity displays the percentage of Used and Available disk volume. It also displays Total, Used and available disk size.

Device Information

User can click Device Information to show current selected SSD information.

Device Information shows Serial number, Firmware version, Model Type, Interface Type, Dimension (NVMe only) and feature list

S.M.A.R.T. Attribute

S.M.A.R.T. Attribute (Self-Monitoring, Analysis and Reporting Technology) SSD support this feature for user to monitor the health, usage of SSD.

NOTE: ADATA A+ SSDTOOL only supports ADATA Industrial SSD product, other brand may get incorrect S.M.A.R.T. value.

The screenshot shows the ADATA Industrial A+ SSDTOOL application window. The title bar reads "ADATA[®] INDUSTRIAL A+ SSDTOOL" and "GLOBAL LEADER IN INDUSTRIAL-GRADE MEMORY". Below the title bar, a dropdown menu shows "Disk0 (C:D: 500 GB) KINGSTON SA2000M8500G" and a "Refresh" button. The main interface has a sidebar on the left with icons for "Overview", "Device Information", "S.M.A.R.T. Attribute" (highlighted in blue), "Utilities", "Alert", and "System Information". The central area is titled "S.M.A.R.T. Attribute :" and contains a table with the following data:

| ID | Attribute Name | Current | Worst | Thresho | Raw Values |
|----|---------------------------------|---------|-------|---------|--------------|
| 01 | Critical Warning | 0 | 0 | 0 | 000000000000 |
| 02 | Composite Temperature | 0 | 0 | 0 | 0000000012F |
| 03 | Available Spare | 0 | 0 | 0 | 00000000064 |
| 04 | Available Spare Threshold | 0 | 0 | 0 | 0000000000A |
| 05 | Percentage Used | 0 | 0 | 0 | 00000000001 |
| 06 | Data Units Read | 0 | 0 | 0 | 00000801D5F |
| 07 | Data Units Written | 0 | 0 | 0 | 0000060D5DD |
| 08 | Host Read Commands | 0 | 0 | 0 | 000007F3EF85 |
| 09 | Host Write Commands | 0 | 0 | 0 | 00000835221F |
| 10 | Controller Busy Time | 0 | 0 | 0 | 00000001014 |
| 11 | Power Cycles | 0 | 0 | 0 | 000000004CF |
| 12 | Power On Hours | 0 | 0 | 0 | 00000000A7F |
| 13 | Unsafe Shutdowns | 0 | 0 | 0 | 0000000005C |
| 14 | Media and Data Integrity Errors | 0 | 0 | 0 | 0000000200E |

At the bottom of the window, the copyright notice reads: "Copyright© ADATA Technology Co., Ltd. All rights reserved."

Utilities

ADATA A+ SSDTOOL utility includes Security Erase and Export Log.

Security Erase: It deletes all data and restore SSD as factory default.

NOTE: After Security Erase is completed, device must reconnect (unplug&plug) to the original system to activate SSD. Otherwise, the SSD device will be locked.

If SSD is installed as master and including operating system, Security Erase feature is disabled and shows selected disk is **!System Drive**.

NOTE:

For security reasons, Windows OS freezes SATA storage device at some condition. This prevents Security Erase from running.

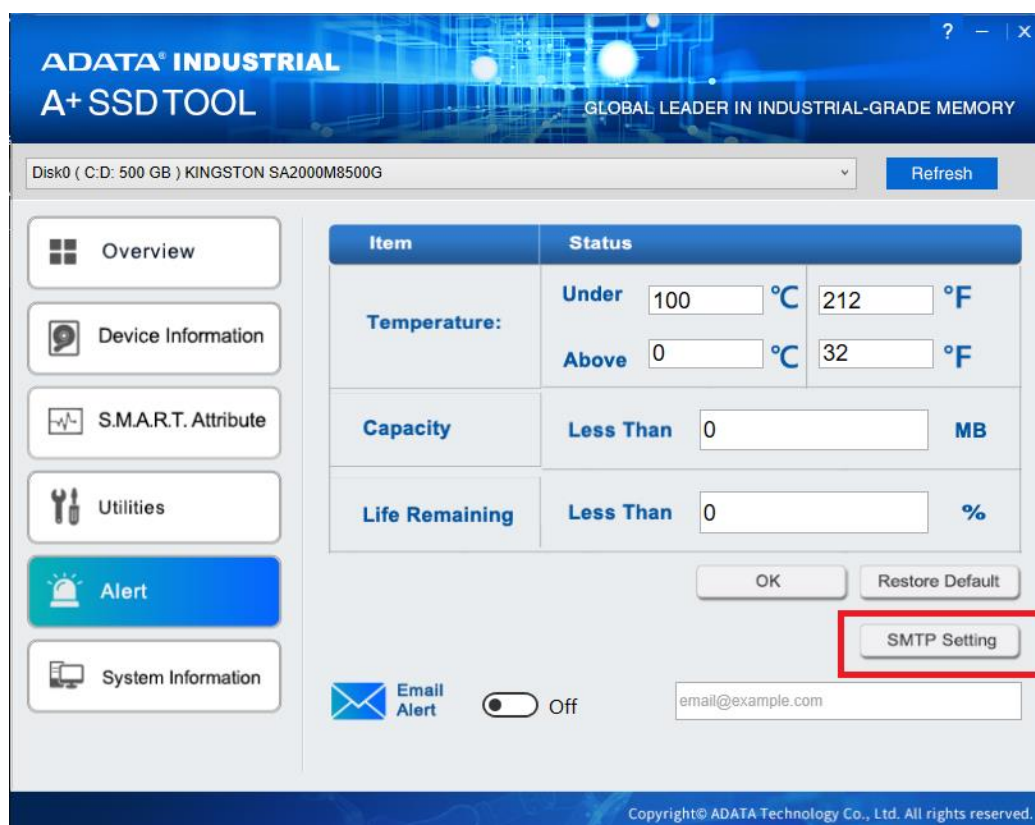

Suggest using SATA to USB adapter to do Security Erase feature on Windows 10 or later.

Export Log: This feature is able to export S.M.A.R.T. information and device information to specified location.

Alert

ADATA A+ SSDTOOL provides alert notice feature. User can configure temperature, capacity, life remaining threshold of SSD, A+ SSDTOOL will send E-mail notification if SSD status triggers user's setting.

Temperatures:

User can see the under and above threshold temperatures appear. By default, these are set to send alerts when the temperature drops below 0°C/32° F or rises above 100°C/212° F. User can change these values.

Capacity:

User can change Capacity value (MB). System sends E-mail notice if SSD size is below this value.

Life Remaining:

User can change Life Remaining (%). System sends E-mail notice if SSD life is below this value.

After user enters the value, please click **OK** to save the data.

User also can click **Restore Default** to restore all data to factory default

Email Alert Setting

User must click **SMTP Setting** to configure SMTP mail server.

SMTP: IP address or hostname of your SMTP server.

PORT: Port number if it's not the default port number.

Account: Account of SMTP server.

Password: Password of account.

Sender: Sender's email address

Example:

This example uses GMAIL settings to illustrate. Fill out the required fields according to the instructions below:

SMTP: smtp.gmail.com

PORT: 587

Account: Enter your Gmail address.

Password: Enter your Google gmail app password which configured by your Google account.

Sender: Enter your Gmail address.

Google Gmail APP Password: please refer to below link:

<https://support.google.com/mail/answer/185833?hl=en>

Type receiver's email address and click switch Email Alert to **On** and click **OK**.

A+ SSDTOOL sends Alert information every 10 mins if there is any Temperatures/Capacity/Life Remaining triggered. Alert Log file location: C:\Program Files (x86)\A+SSDTOOL\Log

Notification E-mail format:

```
-----  
Model :  
Serial Number :  
-----  
Temperature : 32 C (89.6 F)  
Life : 0 %  
Capacity : 373.1 GB  
-----  
Temperature Under : 30 C (86 F)  
Temperature Above : 0 C (32 F)  
Life Threshold : 0 %  
Capacity Threshold : 0 GB  
-----
```

NOTE: Some SMTP server has the limitation by using 3rd party application to send E-mail notification. Please contact IT before using this feature.
